# Are you concerned about hair loss?

Are you a fan of invasive surgery and medications based on synthetic chemicals with potential side effects, or do you prefer a natural and organic product that will work without causing any harm?

In a study of 20 patients, **KOJAXIN** stopped hair loss in more than 88,80% of cases and stimulated growth in 90% of cases. Clinically tested and proven.

In addition, 100% of patients said they would use it again.

Stop hair loss and stimulate growth with **KOJAXIN**.

## TECHNOLOGY

Kojaxin is a hair serum that strengthens hair and activates the growth of hair follicles without the need for ingredients with hormonal activity against hair loss.

It contains 16 highly concentrated and pure active ingredients. The combination of these 16 ingredients produces a synergistic effect that directly acts on the hair follicles of the scalp, reducing hair loss, increasing the volume and density of existing hair, and promoting the growth of hair fibres that were in the shedding phase.

Growth is stimulated in the long term, resulting in radiant-looking hair and healthy vitality from the root of the scalp to the tips. It reinforces the structure, resistance, fullness, and strength of thin and weak hair in both women and men. It can be used to activate hair growth or as a preventative measure to promote long-term hair follicle health

## PERFORMANCE

Hair growth is a natural process regulated by hormones in our body. It is a cyclic process that lasts for months, and therefore when hair loss begins to occur, patience is necessary to reverse this phenomenon. To achieve lasting results, it is necessary to be consistent with the treatment, as changes start to become noticeable after 45 days.

After this established time, small tufts of hair begin to grow around the hairline, which may appear as baby hairs or broken strands. This is new hair growth, which will become thicker and denser as it grows and gains strength over time.

Kojaxin is not only intended for those who want to recover their hair and reverse the loss process, but also for those who want to prevent thin and sparse hair, and for those who simply want to maintain the quality of their hair and use it as a preventive treatment.

## MODE OF USE

Break the ampoule and gently massage the entire content into the scalp with your fingers to stimulate microcirculation and promote absorption. Do not rinse. Leave on for at least 6 hours. For best results, use daily for not less than 45 days.

Recommendations:

- Proper Washing: Wash hair regularly with gentle shampoo and avoid hot water.
- Sun Protection: Protect hair from sun exposure using hats or UV-protection products.
- Gentle Products: Use hair care products without harsh ingredients.
- Balanced Diet: Eat a diet rich in vitamins, minerals, and proteins.
- Hydration: Keep hair well-hydrated with conditioners and moisturizing treatments.
- Stress Management: Reduce stress through relaxation techniques like yoga or meditation.
- Avoid Heat: Limit use of hair dryers, straighteners, and curling irons.
- Scalp Massages: Regularly massage the scalp to improve blood circulation.

# CLINICAL TESTS

A study has been conducted with 20 male and female participants aged between 18 and 65 years old, with hair loss present on the scalp. The study was conducted by evaluating hair density with the TrichoScan® equipment using the standards set by the SCCS in the Guide for Human Research.

The TrichoScan® equipment is capable of measuring the amount of hair fibres present in an area, measuring every centimeter of the surface and analyzing the presence of hair fibres. The presence of more fibres as the treatment is used is a sign of an increase in hair growth.

## EVALUATION OF HAIR DENSITY BY TRICHOSCAN® EQUIPMENT

After 45 daily applications

50.0%

of the volunteers involved in the study noticed greater hair density (up to 17.6% increase)

After 150 daily applications

90.0%

of the volunteers involved in the study noticed greater hair density (up to 29.5% increase)

product

**100.0%**

of the volunteers  
would continue  
applying the product

**100.0%**

of the volunteers  
would buy  
the product

# KEY INGREDIENTS

## Lemon Bio Water

Rich in vitamins and minerals that help revitalize and detoxify hair fibres, thus protecting the hair. In addition, it has a high concentration of potassium, an essential element for life and beneficial for the treatment of hair follicles without growth: it provides an extra energy boost and vitality, leaving the hair fresh and strengthened

## Pea Proteins

High concentration of vegetable protein peptides that provide powerful results in hair fibres. Due to the high concentration of antioxidants such as carotenoids -lutein in particular- and flavonoids, in addition to a high content of vitamin C, vitamin B1, vitamin B2, peas act as antioxidants preventing cellular aging and activating cellular growth from the root of the hair follicle.

## Turmeric Conditioner

Used for the prevention and reduction of hair loss, achieving an increase in hair density. It stimulates follicular activity, optimizes the hair cycle, and improves the density, hardness, and health of growing hair.

## Panthenol

Penetrates the cuticle and hair shaft, where it helps retain moisture and provides volume. It is also a useful moisturizer and emollient. It spreads evenly over the surface of hair strands, forming a thin film on the surface of the cuticle. This film provides greater cohesion to the reflection of light on the surface of the hair, which is manifested in exceptional shine and radiance, providing a healthy hair appearance.

## Arginine

Is an essential amino acid that is not produced by our body and that is part of the hair proteins, that is, of keratin. This amino acid is a precursor to a substance called nitric oxide, which is essential for natural hair growth.

## Soy Extract

Nourishes and moisturizes the hair, restores its flexibility and gives shine, while rehydrating the hair, preventing its loss of colour and protecting the hair tone.

## Wheat Extract

Is a source of essential fatty acids, antioxidants, and high-quality proteins that help prevent and treat hair loss. It promotes healthy hair growth, combats dryness, acts as a natural conditioner, protects the scalp, and helps seal split ends.

## Ginkgo Extract

Activates microcirculation in the scalp. By stimulating blood flow in the scalp, hair follicles receive a greater supply of oxygen and blood. Without this supply, the hair becomes weaker, devitalized and eventually falls out.

# KEY INGREDIENTS

## Peptides

Are vital for the scalp to grow strong. But in addition to stronger hair, hair peptides are one of the best remedies against hair loss, promoting growth and providing thickness and vitality.

## Hops Extract

Has astringent and antiseborrheic properties that help fight certain irregularities in the scalp, such as scaling, excess sebum, dandruff, and other circumstances that contribute to altering hair health. The use of hops on hair helps to calm irritated or saturated scalp, and allows hair to grow stronger and shinier, preventing hair loss and keeping it free of impurities.

## Alfalfa Extract

Is a source of vitamins A, B, C, E and K, as well as minerals such as iron, magnesium, phosphorus, manganese, cobalt, silica, copper, molybdenum, and zinc. All of them are essential for healthy and strong hair. The bioactive substances present in alfalfa (such as chlorophyll) confer a high antioxidant level that helps us to fight the environmental factors that can cause our hair to fall prematurely.

Is rich in isoflavones, natural estrogens that strengthen hair, prevent dandruff and scalp irritations.

## Sweet Clover Extract

## Amino Acids

Are the fundamental building blocks of hair fibre structure. They provide nutrition, hydration, enhance hair growth, and generate a repairing effect on brittle hair.

## Microalgae

Extract from the Isochrysis Galbana algae, whose clinical studies demonstrate that it contains molecules that participate in the hair growth process, enhancing the appearance of new hair fibres and at the same time strengthening and fortifying existing hair.

## Phytic Acid

The absence of vitamins causes hair to grow fragile and brittle. This molecule stimulates hair follicles, promotes cell regeneration, and accelerates the action of other nutrients that participate in hair health.

## Lactic Acid

Known for favouring skin and hair hydration, it penetrates inside hair fibres and reinforces the molecular structure, giving vitality and strength to hair from the inside, necessary for robust and dense hair growth.

## QUESTIONS AND ANSWERS:

### **Can hair grow back with Kojaxin?**

If a hair follicle has been closed for years and is scarred, no new hair can grow. However, if the follicle is still intact, the growth of new hair can be stimulated with Kojaxin. It also helps improve the health of weakened existing hair and strengthen its quality.

### **Can Kojaxin help both women and men?**

Yes, Kojaxin works on both women and men with hair loss.

### **Does Kojaxin have any side effects?**

Kojaxin is a natural product and has no side effects. It contains no steroids, synthetic prostaglandins, Finasteride, Bimatoprost, Minoxidil, or Isopropyl Cloprostenol.

### **Can Kojaxin cause a rebound effect?**

No, Kojaxin is a product that improves the causes of hair loss due to hormonal, nutritional, and inflammatory factors without the use of hormones or rebound effects. It is formulated with natural ingredients and without drugs like Minoxidil, so stopping its use will not cause more hair loss.

### **Can it be combined with other treatments?**

There is no problem in combining it with products like Minoxidil, as Kojaxin is of natural origin and does not compromise the hormonal regulation of the body, thus avoiding the rebound effect that can occur with other pharmacological products.

Until now, people with hair loss problem, relied on some synthetic chemical formulas with potential contraindications. Thanks to years of R&D, the following table shows how KOJAXIN harnesses the power of organic, plant-based ingredients to nourish and revitalize your hair without any unwanted side effects.

	Kojaxin	Synthetic Chemical Famous Formula
