to ensure formula
stability and safety

DESCRIPTION

Next-generation facial treatment with biotechnological pearls suspended in a concentrated serum. Combining biomimetic peptides and natural extracts, it targets the visible signs of ageing.

The pearls gradually release active ingredients, forming a protective layer that **hydrates, enhances** natural radiance, and defends against pollution and urban stress. **The serum helps relax micro-tensions, smooth the appearance of wrinkles, improve skin texture, strengthen the skin's barrier, and restore hydration and elasticity.**

The silky texture of Pulsarytes leaves a pearlescent finish on the skin, brightens the complexion, evens out skin tone, and acts as a perfecting primer.

The SERUM combines Acetyl Hexapeptide-8, a peptide with a Botox-like effect that helps reduce expression lines, and Oat Extract, a natural active ingredient with a film-forming, soothing and tightening effect. Its velvety texture makes Pulsarytes an **anti-ageing booster** and luminous primer that **prepares the skin, prolongs the wear of make-up and enhances its radiant finish.**

HOW TO USE

Use morning and night, also as a primer before makeup.

Massage gently until completely absorbed.

Avoid the direct contact with the internal eye.

NATURAL COMPOSITION

98% Skin-friendly ingredients of natural origin

1% Additional ingredients to ensure formula stability and safety. Dermatologically Tested.

EFFICIENCY

Instant pearlescent glow: pearls reflect light and provide a natural luminous finish.

Instant lifting effect: acetyl hexapeptide-8 peptide helps smooth dynamic wrinkles.

Anti-pollution action: pearls form a protective film that limits particle adhesion and combats environmental oxidation.

"Primer" effect: improves texture, optically smooths the skin and prolongs the wear of make-up.

Comfort and firmness: oats soothe, tone and strengthen the skin barrier.

With continued use, Pulsarytes improves the firmness, radiance and elasticity of the skin, revealing a smoother, more radiant and rejuvenated complexion.

RESULTS

Peptides **improve the appearance of wrinkles**, reducing their volume by 20.6% and their length by 15.9% after just 7 days.

They reduce the number of wrinkles by 11.5%, the surface area of wrinkles by 17.4% **and the size of wrinkles by 13.9%.**

After 28 days of use, applying twice a day: 67% of volunteers said **their skin was less wrinkled**, 86% reported an **increase in the tightening effect**, and 72% said that **makeup application had improved.**

ACTIVE INGREDIENTS

Biotechnological Pearls:

with biotechnological polysaccharides and pearlescent pigments with illuminating, anti-pollution and perfecting effects.

Acetyl Hexapeptide-8: biomimetic peptide that helps reduce expression lines and improves firmness.

Oat Extract (Avena Sativa): natural active ingredient with soothing, tightening and film-forming properties.
